# HEDIS<sup>™</sup> Quick Reference Guide

Updated to reflect NCQA HEDIS 2017 Technical Specifications

Louisiana Healthcare Connections strives to provide quality healthcare to our membership as measured through HEDIS quality metrics. We created the HEDIS Quick Reference Guide to help you increase your practice's HEDIS rates. Please always follow the State and/or CMS billing guidance and ensure the HEDIS codes are covered prior to submission.

.....

## **WHAT IS HEDIS?**

HEDIS (Healthcare Effectiveness Data and Information Set) is a set of standardized performance measures developed by the National Committee for Quality Assurance (NCQA) to objectively measure, report, and compare quality across health plans. NCQA develops HEDIS measures through a committee represented by purchasers, consumers, health plans, health care providers, and policy makers.

## **WHAT ARE THE SCORES USED FOR?**

As state and federal governments move toward a quality-driven healthcare industry, HEDIS rates are becoming more important for both health plans and individual providers. State purchasers of healthcare use aggregated HEDIS rates to evaluate health insurance companies' efforts to improve preventive health outreach for members.

Physician-specific scores are also used to measure your practice's preventive care efforts. Your practice's HEDIS score determines your rates for physician incentive programs that pay you an increased premium — for example Pay For Performance or Quality Bonus Funds.

## HOW ARE RATES CALCULATED?

HEDIS rates can be calculated in two ways: administrative data or hybrid data. Administrative data consists of claim or encounter data submitted to the health plan. Hybrid data consists of both administrative data and a sample of medical record data. Hybrid data requires review of a random sample of member medical records to abstract data for services rendered but that were not reported to the health plan through claims/encounter data. Accurate and timely claim/encounter data reduces the need for medical record review. If services are not billed or not billed accurately, they are not included in the calculation.

## HOW CAN I IMPROVE MY HEDIS SCORES?

- Submit claim/encounter data for each and every service rendered
- Make sure that chart documentation reflects all services billed
- Bill (or report by encounter submission) for all delivered services, regardless of contract status
- Ensure that all claim/encounter data is submitted in an accurate and timely manner
- Consider including CPT II codes to provide additional details and reduce medical record requests

ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT

Measure evaluates the percentage of adolescent and adult members with a new episode of alcohol or other drug dependence (AOD) who:

- Initiated dependence treatment within 14 days of their diagnosis
- Continued treatment with 2 or more additional services within 30 days of the initiation visit

For the follow up treatments, include an ICD-10 diagnosis for Alcohol or Other Drug Dependence from the Mental, Behavioral and Neurodevelopmental Disorder Section of ICD-10 along with a procedure code for the preventive service, evaluation and management consultation or counseling service (see codes below).

**ASTHMA (Medication Management)**

Measure evaluates the percentage of patients who were identified as having persistent asthma and were dispensed appropriate medications which they remained on during the treatment period within the past year. For Medicare members, the age range measured is 18 to 85 and for Medicaid recipients, the age is 5 to 64.

RATES	HCPCS
<b>Medication Compliance 50%:</b> Members who were covered by oneasthma control medication at least 50% of the treatment period	Antiasthmatic combinations, Antibody inhibitor, Inhaled steroid combinations, Inhaled corticosteroids, Leukotriene modifiers, Mast cell stabilizers, Methylxanthines
<b>Medication Compliance 75%:</b> Members who were covered by oneasthma control medication at least 75% of the treatment period	

**BMI ASSESSMENT**

This measure demonstrates the percentage of members ages 18 to 74 who had their BMI documented during any outpatient visit in the past two years. Recommendation is for adults to have BMI assessed at least every 2 years.

- For patients 20 and over: Code the BMI value on the date of service.
  - For patients younger than 20, code the BMI percentile value set on the date of service.
- Ranges and thresholds do NOT meet criteria; a distinct BMI value or percentile is required.

**CARE FOR OLDER ADULTS**

Measure evaluates four components:

- At least one functional status assessment per year. Can be a standard assessment tool or notation of either of the following: Activities of Daily Living (ADLs); Instrumental Activities of Daily Living \*(IADL); or at least three of the following: notation of cognitive status, ambulation status, sensory ability (hearing, vision, and speech), and/or other functional independence.
- Evidence of advance care planning and the date of the discussion or the presence of a plan
- At least annually, a review of the patient’s medications by a prescribing practitioner. Includes the presence of a medication list and review of the medications. Transitional care management services also meet criteria.
- At least annually, a pain assessment, either through a standardized pain assessment tool or documentation that pain was assessed.

Meningococcal	1 on or between 11th – 13th birthdays	90644, 90734	—	136, 148
Tdap	1 on or between 10th – 13th birthdays	Tdap-90715	—	115
Human Papillomavirus (HPV)	Three doses by 13th birthday	90649-90651	—	62, 118, 165

Exclusions for Immunizations

Any vaccine	• Anaphylactic reaction
DtaP	• Encephalopathy with a vaccine adverse-effect
MMR, VZV and influenza	• Immunodeficiency
	• HIV
	• Lymphoreticular cancer, multiple myeloma or leukemia
Rotavirus	• Anaphylactic reaction to neomycin
	• Severe combined immunodeficiency
	• History of intussusception
IPV	• Anaphylactic reaction to streptomycin, polymyxin B or neomycin
Hepatitis B	• Anaphylactic reaction to common baker’s yeast

LEAD SCREENING IN CHILDREN

Measure evaluates the percentage of children who had a screening test for lead poisoning at least once prior to their second birthday. A lead screening completed in the practitioner office is also allowable.

CPT
83655

PHARYNGITIS (APPROPRIATE TESTING)

Measure evaluates the percentage of children age 3-18 diagnosed with pharyngitis, dispensed an antibiotic and received a group A streptococcus (strep) test for the episode. A higher rate represents better performance (i.e., appropriate testing). Ensure any secondary diagnoses indicating the need for an antibiotic are submitted on the claim. Rapid strep tests in the office are acceptable and should be billed.

UPPER RESPIRATORY INFECTION (APPROPRIATE TREATMENT)

Measure evaluates the percentage of children age 3 months–18 years who were given a diagnosis of upper respiratory infection (URI) and were not dispensed an antibiotic prescription. Ensure any secondary diagnoses indicating the need for an antibiotic are submitted on the claim.

**WEIGHT ASSESSMENT AND COUNSELING FOR NUTRITION AND PHYSICAL ACTIVITY**

Measure demonstrates the percentage of members ages 3–17 who had an outpatient visit with a PCP or OB/GYN and who had evidence of the following completed at least annually: 1) BMI percentile documentation1; 2) counseling for nutrition; 3) counseling for physical activity.

DESCRIPTION	CPT	ICD-10 DIAGNOSIS	HCPCS
BMI Percentile	—	Z68.51-Z68.54	—
Counseling for Nutrition	97802-97804	Z71.3	G0270, G0271, G0447, S9449, S9452, S9470
Counseling for Physical Activity	—	Z02.5	G0447, S9451

Because BMI norms for youth vary with age and gender, this measure evaluates whether BMI percentile is assessed rather than an absolute BMI value. The percentile ranking is based on the Centers for Disease Control and Prevention’s (CDC) BMI-for-age growth charts.

Pregnant members excluded.

**WELL CHILD AND ADOLESCENT WELL CARE VISITS**

Components of a comprehensive well visit include:

- 1) a health history; 2) a physical developmental history; 3) a mental developmental history;
- 4) a physical exam; and 5) health education/anticipatory guidance.

Visits must be with a primary care practitioner (pediatrician, family practice, OB/GYN), even though the PCP does not have to be the practitioner assigned to the child. Assessment or treatment of an acute or chronic condition do not count toward the measure. Use age-appropriate codes when submitting well child visits.

**Well Child Visits in the First 15 Months of Life**

Measure evaluates the percentage of infants who had 6 comprehensive well care visits within the first 15 months of life. Initial hospital care for evaluation and management of normal newborn infant counts toward the measure (99461).
